3 Section III

4 Section IV

Body slide example 1

Motivation

Section I

Subsection 1

Subsection 2

Section II

Example Table

Example Figure

Section III

Section IV

- After the outbreak of COVID-19, the global economy experienced ...
- The literature has yet to identify its causes.
 - A survey conducted by World Bank implies
 - However, the recent survey by IMF shows ...
- Three possible causes:
 - ① Item 1
 - ② Item 2
 - ③ Item 3

Body slide example 2

What we do

Section I

Subsection 1

Subsection 2

Section II

Example Table

Example Figure

Section III

Section IV

- 1 Construct a general equilibrium model incorporating ...
- 2 Take the model to the data including the pandemic period.
- 3 Run simulations with the estimated model.

Body slide example 3

What we find

Section I

Subsection 1

Subsection 2

Section II

Example Table

Example Figure

Section III

Section IV

- Our findings are threefold:
 - ① Finding 1
 - ② Finding 2
 - ③ Finding 3
- Additional Comment 1
- Additional Comment 2

Blocks of Highlighted Text

Block Title

“block” generates this type of block.

Example Block Title

“exampleblock” generates this type of block.

Alert Block Title

“alertblock” generates this type of block.

You can use these commands without a title. If you do so, this type of block will be generated.

Definitions & Theorem

Section I

Subsection 1

Subsection 2

Section II

Example Table

Example Figure

Section III

Section IV

Definition

A good is **normal** if the demand for it increases as income rises.

Theorem (1st Fundamental Theorem of Welfare Economies)

If the price and allocation constitute a competitive equilibrium, then this allocation is Pareto optimal.

Lemma, Proof, & Corollary

Section I

Subsection 1

Subsection 2

Section II

Example Table

Example Figure

Section III

Section IV

Lemma (Shepard's lemma)

If $z(\bar{w}, q)$ consists of a single point, then $c(\cdot)$ is differentiable with respect to w at \bar{w} and $\nabla_w c(\bar{w}, q) = z(\bar{w}, q)$.

Proof.

See Chapter 15 of the textbook.

Corollary

A pure strategy profile is a Nash equilibrium of a game if and only if it is a degenerated mixed-strategy Nash equilibrium of the game.

Section IV

Citing References

- Literature focuses on
 - ① imperfect information [Smith, 2022]
 - ② transaction cost [Appleseed, 2020]
- This is an example of citing references.
